Site Property Owner
Address: Site Address Line 1
Site Address Line 2

Based on the Compliance Inspection of your MPCA Type I, II, III, IV, or V System shown below and the information on file, this ISTS has been classified as nonconforming for the following reason(s):

Boiler Plate Reasons

MPCA System Type:

Design Flow Rate:

Dwelling:

Bedrooms:

Below Ground	Width:	Length:	Tank Type	# of Tank	Gallons
Media Type :			Septic Tank		
Cover Depth :					
Distribution Method :					
Media :					

A non-conforming system is still considered to be a passing system and may continue to be used as is and is not required to be upgraded. Properties can be transferred with a non-conforming system. The system can be used until it fails, or until the owner applies for a bedroom addition or other substantial increase in water use, a conditional use permit, or a variance. Though the system may not meet all current technical standards, the system complies with applicable regulations. The notice is valid for a period of three years and must be disclosed to any buyer.
